XU Jingjing , Ph.D.

Founder and Chairperson of Board, Meridian Medical Network Corp.

Dr. Jingjing Xu has been working in the healthcare investment and cross-border cooperation since 1990s. Dr. Xu returned to China with a Silicon Valley AI and big data team and founded Meridian Medical Network Corp. in Beijing in 2010, with the mission to make health and wellness services universal and sustainable. Meridian has structuralized 100 million people healthcare big data and developed the Next Generation Digital Healthcare Service Platform - the "3-in-1 Integrated Cloud Platform for AI Services" (Primary Care AI Cloud, Family Wellness Care AI Cloud and Specialists AI Cloud). The Platform provides high quality, high efficiency and low cost services integrating prevention care, clinical care and recovery care for individuals and families, while connecting to the appropriate specialists via telemedicine or offline services on the basis of the analysis of the health data of the individuals and families. The Platform enhances the clinical diagnostic capabilities and productivities of the PCP and family doctors, empowering their service offerings. Meridian has deployed its AI Services Platform in over 2000 medical institutions covering over 10 million people, and is expected to have deployment roll-out in exponential manner. Dr. Jingjing Xu is recently awarded the "2021 Global Social Entrepreneurship Pioneer Award."
